KEKELI LAMADEKU

Accra / Greater Accra Region, Ghana | +233 547 085 189 | kellygh45@gmail.com

PROFESSIONAL PROFILE

Electrical/Electronic Engineering graduate with hands-on field experience in low and medium voltage electrical maintenance, installation, testing and commissioning. Practical exposure to distribution transformers and substations, cable routing/laying/termination, earthing works, solar PV and general wiring, supported by strong fault diagnosis and drawing-interpretation skills. Committed to safe work practices, risk assessment and full compliance with site, statutory and regulatory standards in demanding industrial and mining environments.

CORE COMPETENCIES

- Low- and medium-voltage electrical maintenance and installation
- Distribution transformer / substation shutdown maintenance
- Cable routing, laying and termination; earthing works
- Insulation resistance testing and earth resistance testing
- Electrical installation inspection and fault troubleshooting
- Generator sets and solar PV installation and assessment
- Reading and interpreting electrical drawings, BOQs and datasheets (AutoCAD)
- Risk assessment, isolation/lock-out and safe work practices
- Working knowledge of Ghana Electrical Wiring Regulations (L.I. 2008)

WORK EXPERIENCE

Project Engineer Dec 2025 – Present

Bremenenergie Services Limited — Accra, Ghana

- Support the end-to-end execution of electrical engineering projects from planning and design review through installation, testing, commissioning and handover.
- Execute site installation works including cable routing, cable laying, cable termination, equipment installation, earthing works and field-device installation in line with technical specifications and drawings.
- Gained working exposure to electrical and instrumentation (E&I) field devices during installation and commissioning of project systems.
- Review electrical drawings, BOQs, technical specifications, datasheets and material schedules to guide installation sequencing and accurate procurement.

- Drive technical procurement by preparing material requests and RFQs, comparing supplier quotations, following up on deliveries and verifying delivered materials against project requirements.
- Conduct inspections, quality checks, testing and pre-commissioning activities, and compile handover documentation to client and project standards.
- Track project progress, material availability, pending works and punch-list items to support timely, cost-effective project delivery.
- Carry out risk assessment and apply safe work practices throughout all site activities, isolating equipment and reporting hazards.

Junior Field Technician Jan 2025 – Oct 2025

SmartTransyt — Accra, Ghana

- Maintained and monitored electric-bus battery systems and on-board electrical and electronic equipment, tracking health, performance and routine upkeep.
- Performed routine condition monitoring, quality control and reporting on the overall electrical health and physical condition of the fleet.
- Diagnosed and troubleshot electrical and electronic faults, escalating anomalies for timely corrective action.
- Resolved technical queries from drivers and operations staff on the electric-vehicle electrical ecosystem.
- Contributed to research and development initiatives aimed at improving the electric-vehicle electrical systems.

National Service Personnel Dec 2022 – Sep 2023

Electricity Company of Ghana Ltd. (Projects Office) — Accra, Ghana

- Assisted engineers in shutdown maintenance on distribution transformers, supporting safe isolation, inspection and reinstatement.
- Performed wiring inspections, insulation resistance testing and earth resistance testing on electrical installations.
- Collected and collated field data for energy audits and power-quality assessments.
- Evaluated HVAC systems, lighting, appliances and equipment for energy performance and condition.
- Analysed energy bills and consumption data to identify efficiency improvement opportunities.

Electrical Engineering Intern Sep 2021 – Dec 2021

MS-Plus Engineering Limited — Lakeside, Adentan, Ghana

- Assisted technicians in solar PV panel installation and general electrical wiring works.
- Supported testing, inspection and assessment of electrical installations.

- Conducted power-quality analysis under supervision and recorded results for review.

EDUCATION

BSc. Electrical / Electronic Engineering Aug 2018 – Sep 2022

Kwame Nkrumah University of Science and Technology (KNUST), Kumasi

WASSCE – General Science Nov 2015 – May 2018

Dzodze-Penyi Senior High School, Dzodze

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Project Management Professional Certificate – Google (via Coursera)

REFEREES

Ing. Patricia Pokua Sasu — Manager, Energy Efficiency, Electricity Company of Ghana (Projects Office) | +233 24 386 4726
